

The Comprehensive Solution for Managed Care

Quantum Choice, the cutting-edge platform from PLEXIS Healthcare Systems, is engineered to transform the way Managed Care Organizations and PACE plans operate, ensuring that healthcare payer administrators can focus on what matters most — providing outstanding care to their clients and being as operationally efficient as possible.

Comprehensive Provider Data Management

Quantum Choice stands out with its robust provider data management capabilities, adept at tracking providers, managing corresponding vendor, practice office, and network affiliation details. This includes direct contract administration and fee schedule management, enabling many different reimbursement methodologies (Medicare, Medicaid, other) – including different reimbursement methods for the same provider based on different conditions.

Capitation : Revenue Reconciliation, Provider Payments

Revenue Reconciliation: Harness the power of Quantum Choice's advanced capitation reconciliation capability. Quantum Choice enables finance departments to reconcile the revenue amount received from the respective government entity (Medicare, Medicaid) with the amount expected to be received for each eligible plan member, ensuring awareness of potential financial risk.

Provider Capitation Payments: Quantum Choice enables health plans to capitate and provide prospective payments to providers based on eligible members assigned to those providers, fostering financial clarity and efficiency.

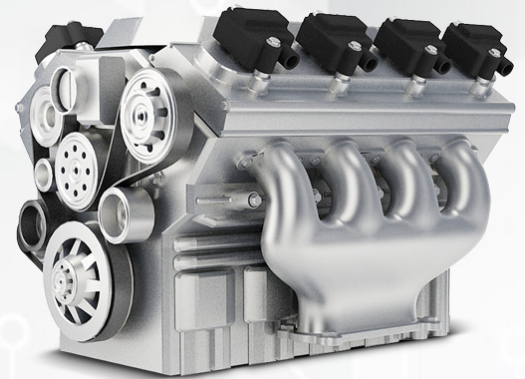

Seamless Integration

Easily integrate your Electronic Health Record (EHR) system with Quantum Choice, providing a unified and streamlined ecosystem for key healthcare data records and transactions. This integration ensures that information flows smoothly between systems, minimizing errors and enhancing patient care quality. For example, if the EHR is the system of record/source of truth for member/eligibility and/or referral data, the EHR can automatically feed this data to Quantum Choice via web service calls to ensure this data is loaded within the core administrative system prior to receipt of a claim.

Automated Claim Processing

Quantum Choice enables auto-adjudication of claims, including use of EDI for automated receipt and loading of claims, and supports real time application of Medicare edits and pricing. Once claims are processed and paid, plans have to perform specific claim encounter reporting to CMS (Medicare) and potentially the state (Medicaid) as well. Quantum Choice provides X12 837 claim encounter file extract processing, which are submitted to our partner's Encounter Reporting Process portal which is tailored for both state (Medicaid) and federal (CMS) requirements. The combination of auto-adjudication of claims followed by a structured encounter reporting process speeds up the claim handling process while maintaining precision and compliance with government health plan administrative requirements.

Targeted to Your Needs

PLEXIS Quantum Choice - with functions tailored specifically for delegated managed care organizations and PACE plan administrators, enable operational efficiency and plan compliance. The system's design speaks to the challenges and complexities inherent in managing public-sector health plans, providers and networks, unique member data, and the overall patient care, delivering solutions that directly address these challenges.

Additional Support and Capabilities

- ❖ **Workflow capabilities that streamline processes and improve productivity.**
- ❖ **ORION Task Management for claims workflow, inventory management, and customer service needs.**
- ❖ **PLEXIS Alerts for monitoring business activity and enhancing workflow applications.**
- ❖ **PLEXIS Quantum Data Services (QDS) and Quantum Choice Application Interface Services (AIS) to enable real time and batch integration with other software applications, portals, and trading partners.**
- ❖ **Proven performance metrics demonstrate Quantum Choice's claim processing competence.**

PLEXIS Healthcare Systems has been named a Sample Vendor in Gartner's **Hype Cycle for U.S. Healthcare Payers, 2023** report. PLEXIS has also been positioned as a Major Contender within Everest Group's **Healthcare Cloud-based Core Administration Platforms PEAK Matrix Assessment 2023**.

PLEXIS leverages cloud hosting, next-generation BPO, open APIs, modular solutions, highly configurable benefit administration, and greater visibility with ready access to real-time data.
